

DropTop.™

In a world where remote and hybrid working are the new norm, the work-from-anywhere perk is evolving rapidly. So-called workcations are set to become increasingly popular and some hotels will take advantage, innovate and reap the benefits.

STYLISH, PRACTICAL & STRONG

DropTop.™ gives your guests all the tools they need to maximise productivity whilst away from the office, all whilst complimenting your interior decor and styling.

From "workcation" seekers to entrepreneurs and self employed individuals, having a desk that can actually be used for productive work while on holidays can prove a real gamechanger for almost anyone.

A DESK BUILT FOR THE MODERN INTERIOR

Strong

Very sturdy, our Light desks can support 50kg with minimal flex.

Fixes to most walls

Easily fitted on almost all wall types including plasterboard and brick.

Easy to install

Designed for easy DIY installation. If you can fit a TV wall mount you can fit a DropTop.™

POWERFUL WORKSTATION

Give your guests more than just a space to put their laptop on, wow them by providing start-of-the-art remote working facilities. Swap the traditional bulky desk with a powerful, ergonomic, multi-screen workstation.

CUSTOMISABLE ART

With its unobtrusive design that folds away when not in use, DropTop.™ is there when your guests need it but subtly out of sight when they don't. It is a great space saver, an impressive decorative object and a practical desk all in one.

Built To Last

Hand Built in our workshop in Hertfordshire, England, our award winning smart desks are made using cutting edge technology, hand crafting techniques and high quality materials, using over 100 parts in the final assembly.

Almost everything that goes into the creation of a DropTop.™ desk is designed, engineered and made in house by our skilled craftsmen. This is how we achieve incomparable strength and ensure they reach the high-quality standard we hold ourselves to.
