# DropTop™ Max Classic

Installation Instructions.

1

DropTop™ Max Classic

Installation Guidelines

Please read and follow these instructions carefully to ensure the correct installation of your DropTop™ wall-mounted desk. Failure to adhere to the instructions may result in product damage, personal injury, or voiding of the product warranty.

Before You Begin:

- Remove the contents from the package and place them on a protective surface to prevent damage.

- Compare the package contents with the Supplied Parts List to ensure all components are intact and undamaged.

- Thoroughly read and review all instructions provided in your DropTop™ Installation guide before beginning assembly.

If you encounter any issues or have questions during the assembly process, please contact our customer support team for assistance.

This way up.
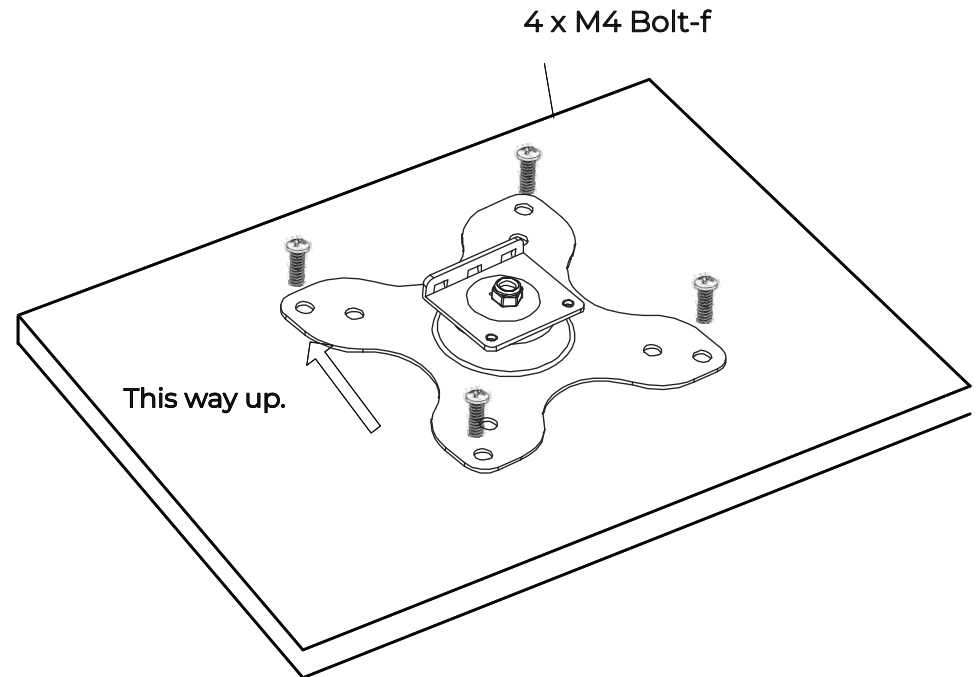

Carefully place your monitors face down on a clean, flat surface. Attach the VESA Plate-b to the back of your monitor using the M4 Bolts-f provided.

3

Wall Plate &
Articulating Arms-A

Back View

2 x M6
Bolt

Attach the Wall Plate & Articulating Arms-A to the VESA slot on the back of the DropTop, using the 2 x M6 bolts provided.

4

Fully extend the articulating arms out.
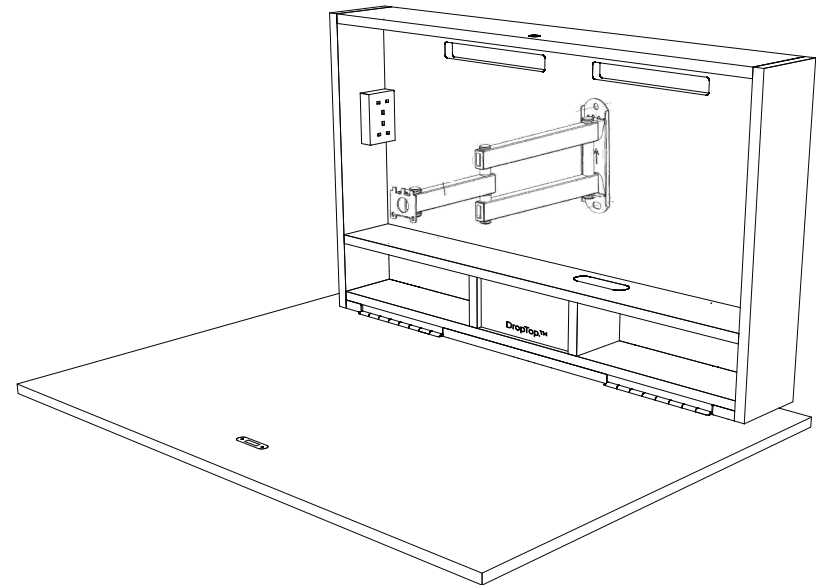

5

Hook the VESA Plate-b to the Socket on the fully extended arms.
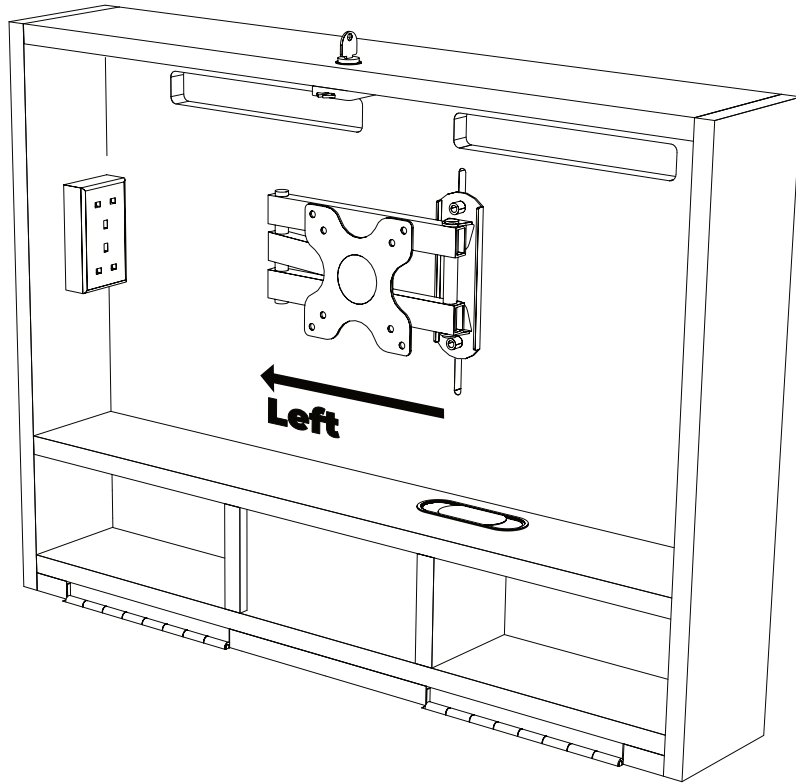

6

3.3
d

Secure the VESA Plate-b to the articulating arm using the 2x M4 Bolt-d provided.

c

Use the wrench provided to adjust the tilting angle of the VESA Plate-b.
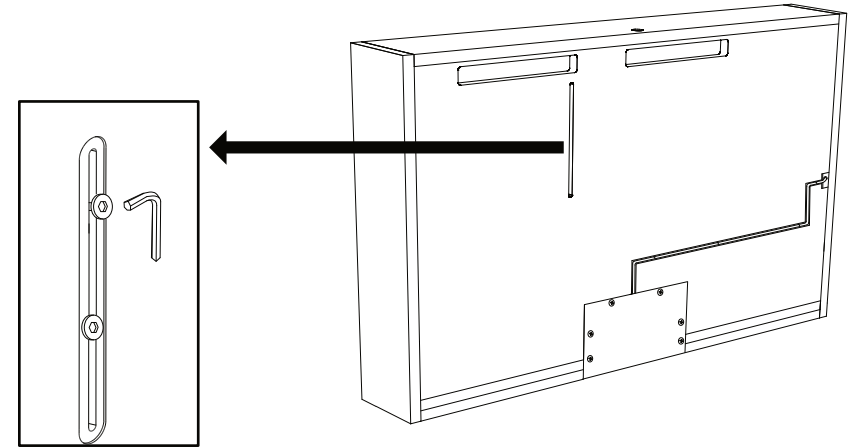

7

Left

The mount bracket should be positioned as indicated in the diagram to ensure proper and mounting of the monitors.
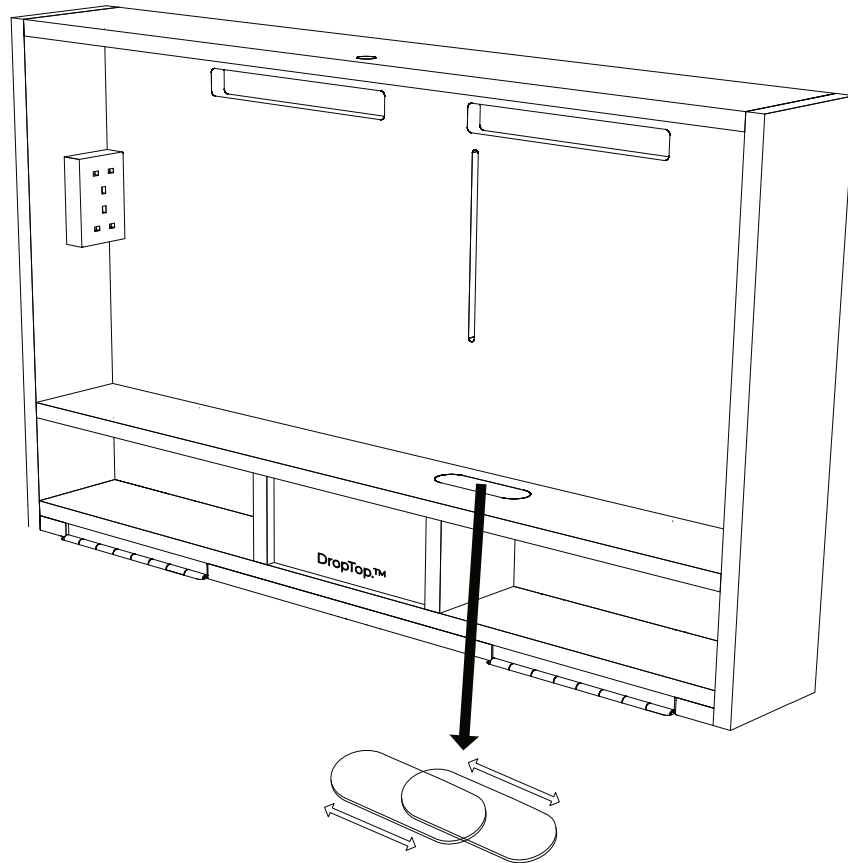

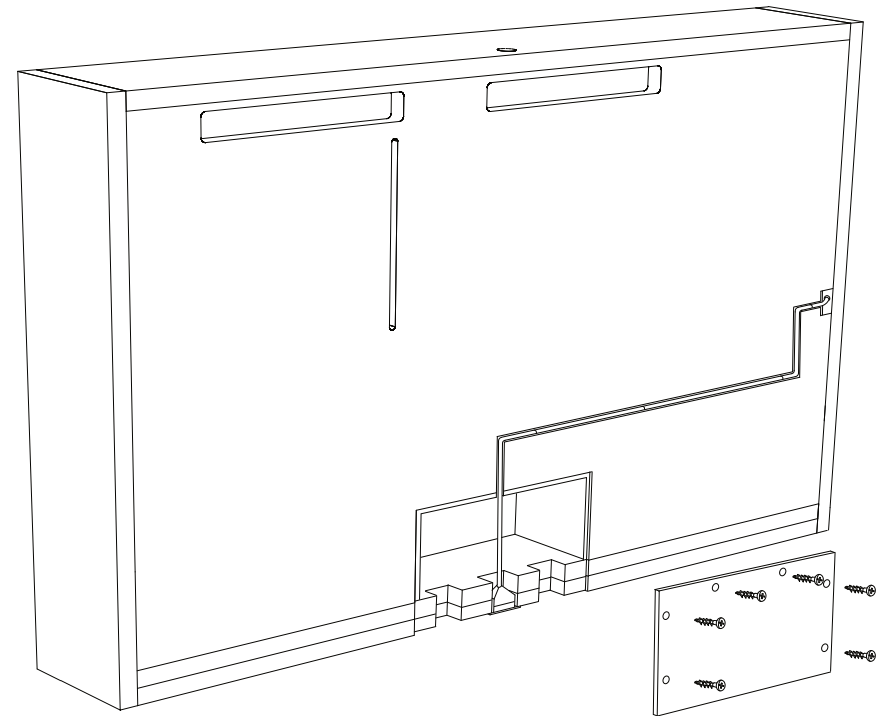

8

Back View

To adjust the height of the mount along the VESA slot, slightly loosen the M6 bolts on the back, then reposition the mount to the desired height and tighten the bolts again.
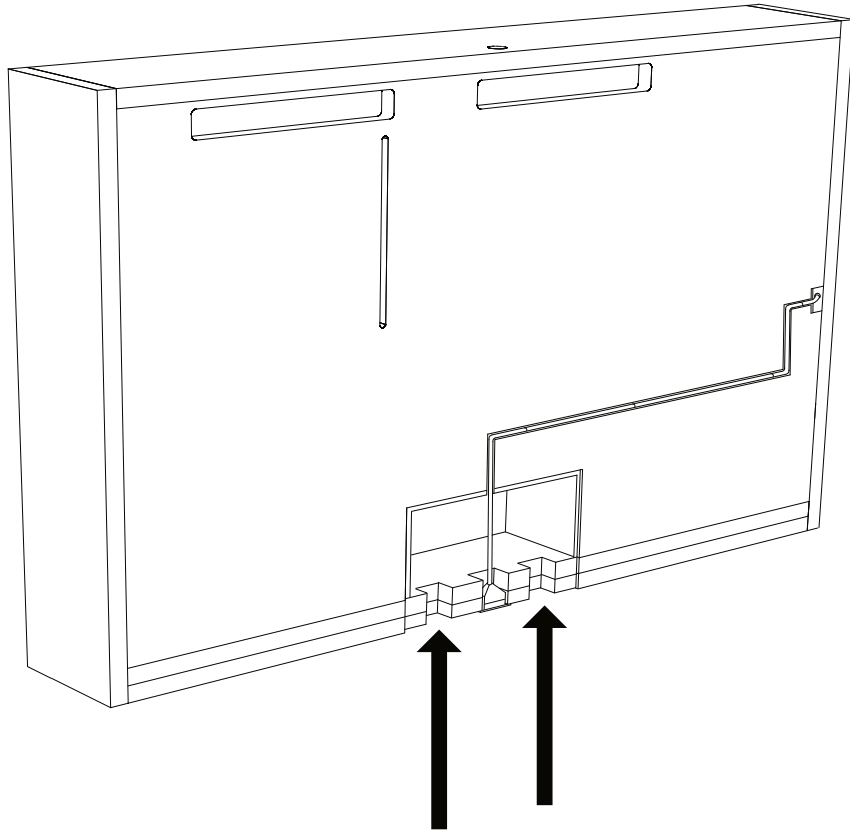

Cable Management

Before mounting your DropTop onto the wall, connect any cables to your monitor and feed them through the oval cable management grommet to keep them tidy.

The central shelf housing contains the electrical cable that powers your DropTop.
To access it, remove the screws from the wood cover.

The central shelf housing can be used to hide extra cables or pass through a wired Ethernet cable, if needed.
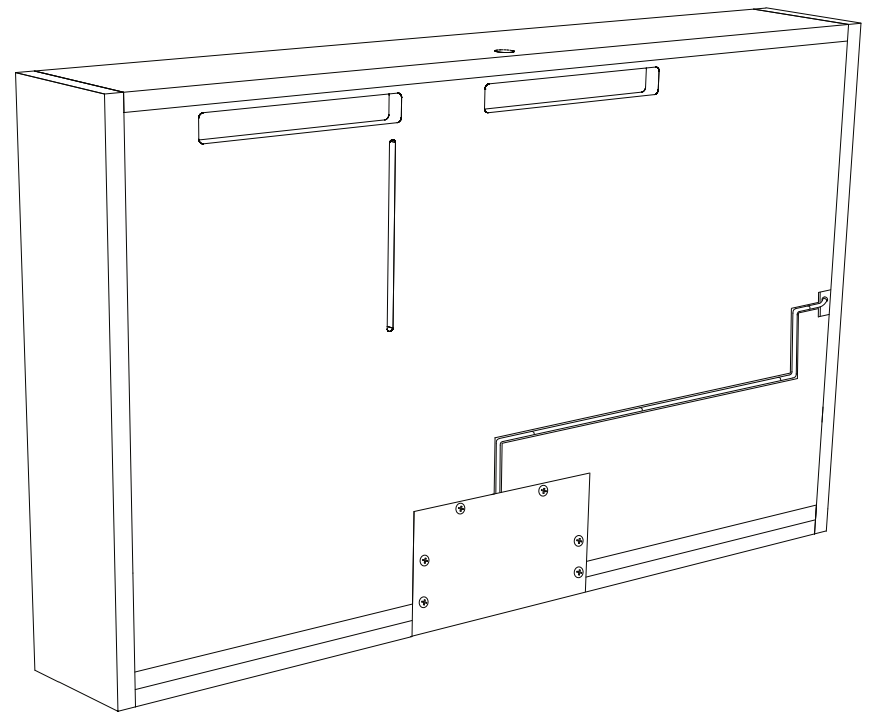

To re-attach the wood cover, screw in the screws.

Mounting the Wall plate.

Wall plate Height

54cm

Worktop Height

Your preferred desk height.

Floor

Your DropTop.™ desk can be installed at any height that best suits your needs and preferences.

Depending on your preferred sitting position, you can install your DropTop™ on the wall between 65cm and 80cm.
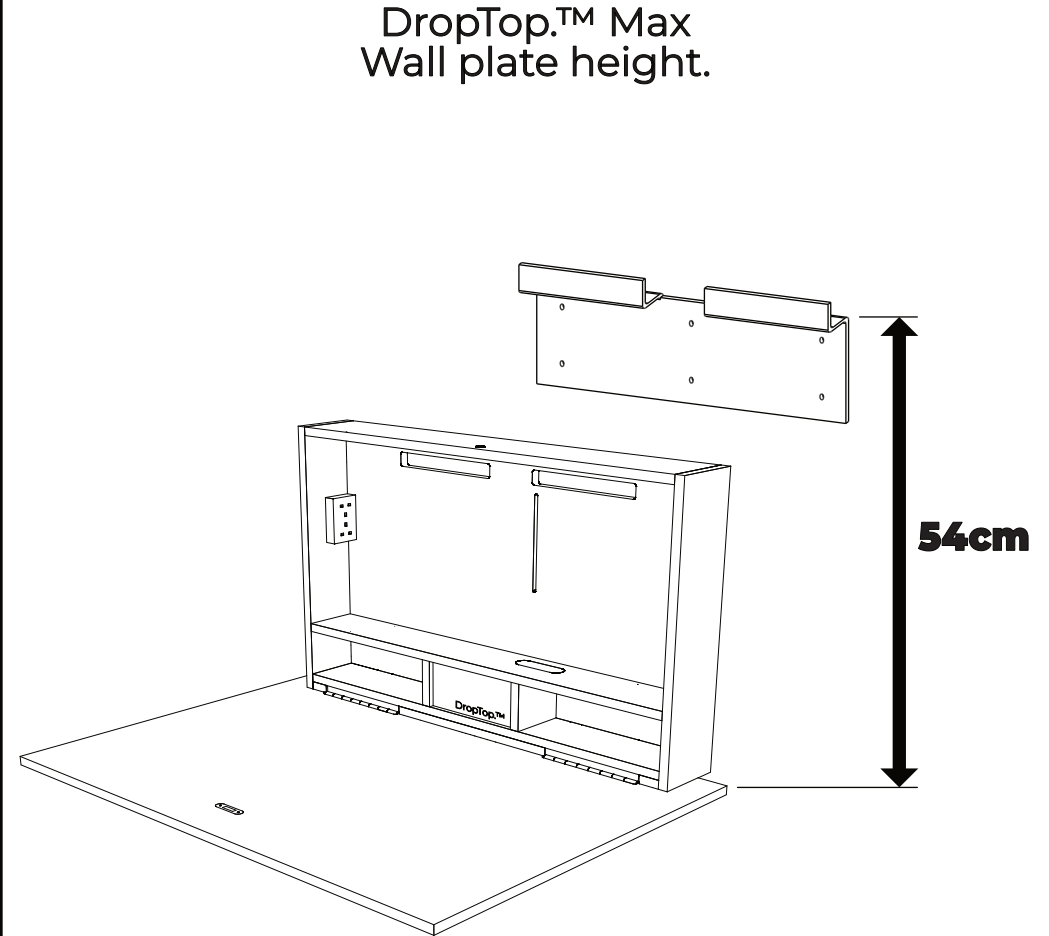

DropTop.™ Max
Wall plate height.

54cm

The height to install the wall plate should be measured from the top of the desired desk height to the top of the recessed area of the wall plate.
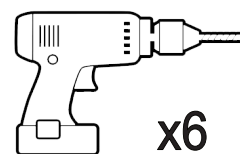

Installing on a brick and concrete wall.

1
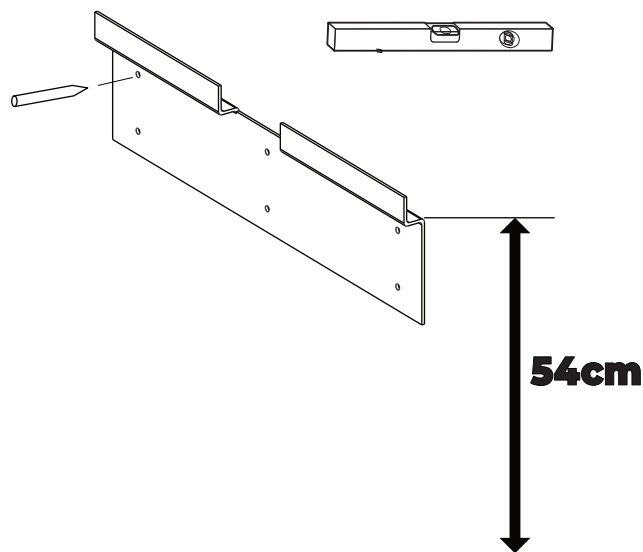

54cm

Use the wall plate as a guide and mark the position of the fixing holes with a pencil.

The height to install the wall plate should be measured from the top of the desired desk height to the top of the recessed area of the wall plate.as previously explained.
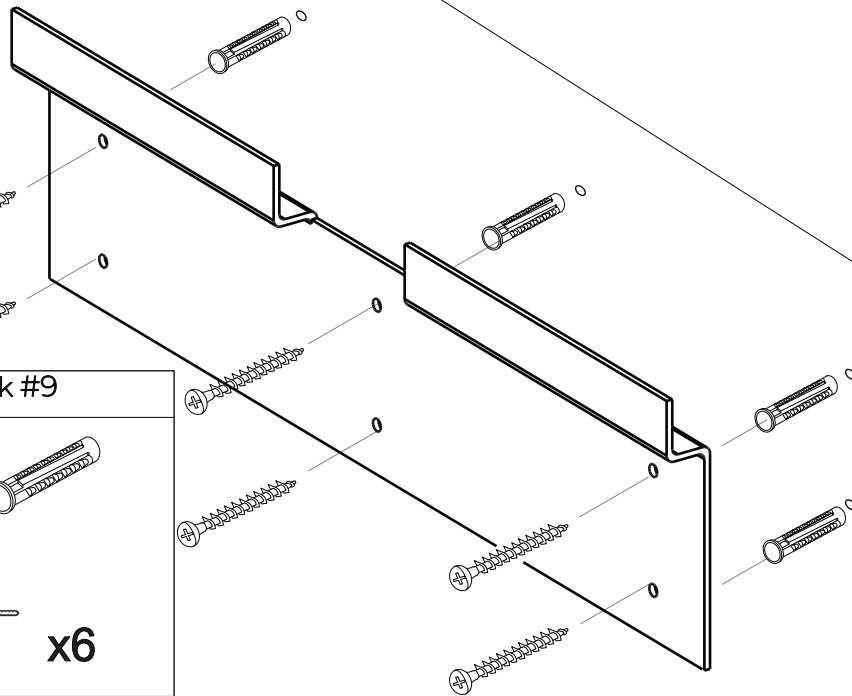

## 2

Wall

x6

Drill 6 x 8mm sized holes.

3

**Wall**

4

To safely mount the desk, ensure that the DropTop.™ is **locked** before lifting it onto the wall plate. The DropTop.™ should fit snugly in the recess of the wall plate.

Installing on Plasterboard/Drywall.
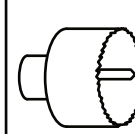

1

54cm

Use the wall plate as a guide and mark the position of the fixing holes with a pencil.
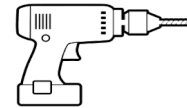

The height to install the wall plate should be measured from the top of the desired desk height to the top of the recessed area of the wall plate as previously explained.
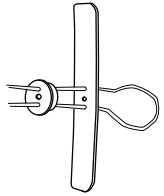

2

Wall

Using a hole saw, cut 3 holes of 25mm diameter centred on the top row of your wall plate pencil markings for the Geefix.
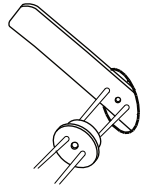

Drill 3 holes of 8mm diameter for the wall plugs.

3

GeeFix Fixings

Assemble your GeeFix wall anchor system by threading the supplied pullcord through the round wall plug, the curved back plate, and back through the wall plug.

While holding onto the pullcord, feed the curved back plate into the hole and centre on the 1" hole.

While keeping light tension on the pullcord slide the wall plug into the 1" hole to align with the holes on the back plate.
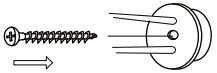

While keeping firm tension on the pullcord, screw the large screw into the centre hole until the GeeFix becomes firm, but do not over tighten. Keeping tension on the pullcord will keep the back plate in place during installation.
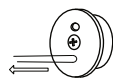

Pull out the pullcord but do not discard. You can use the same pullcord on additional GeeFix.
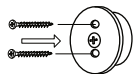

Screw in the 2 smaller screws on either side of the large screw and tighten until the GeeFix is firmly secured but do not over tighten.
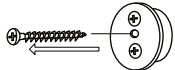

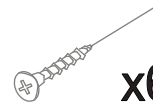

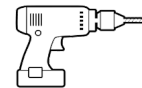

Remove the centre screw
